Zinc	48mg	Vitamin B5	8.75mg
Iron	40mg	Vitamin B6	6mg
Copper	6mg	Vitamin B12	15ug
Selenium	0.2mg		

Feeding Guide

Laying hens from point of lay (approx 20-22 weeks of age) to the end of lay should have unlimited access to Goldfields Layer Pellets

- It is very important to have access to cool clean fresh water at all times
- When hens enter the end of the lay period shell quality may deteriorate. Supplementation of the diet with calcium grit or shell grit may improve shell quality
- This feed may also be used to feed non commercial layer breeders
